

Report

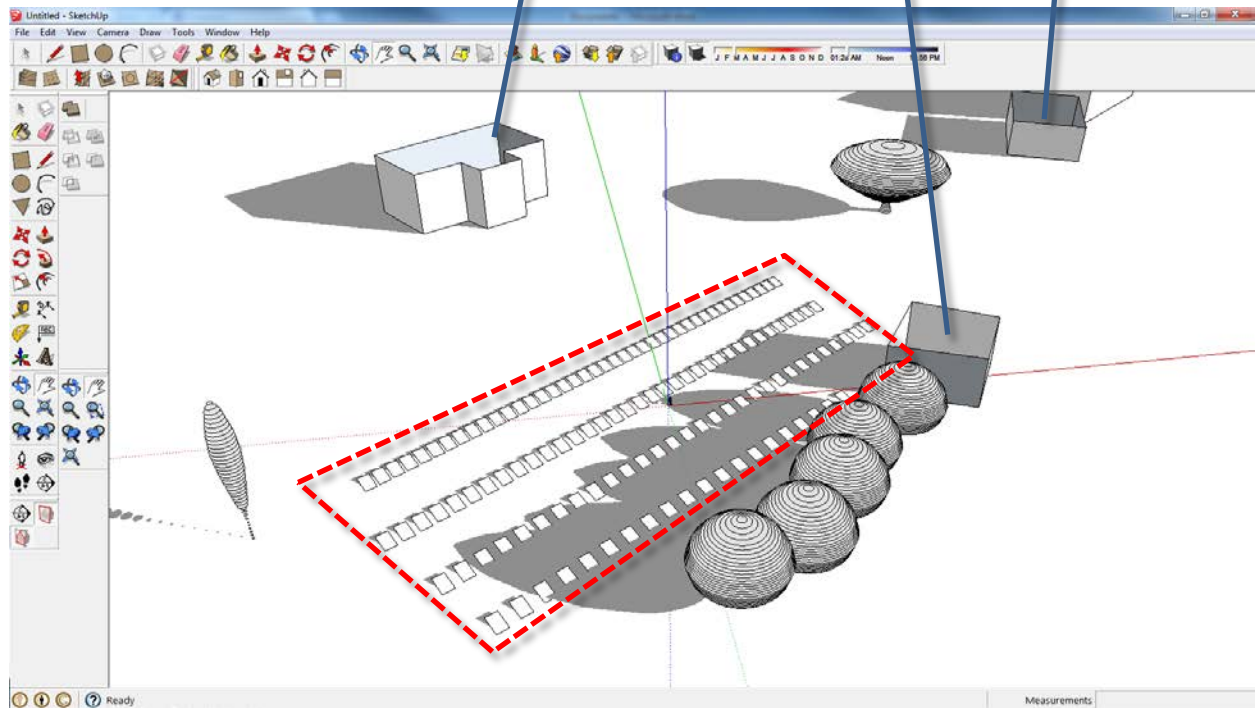

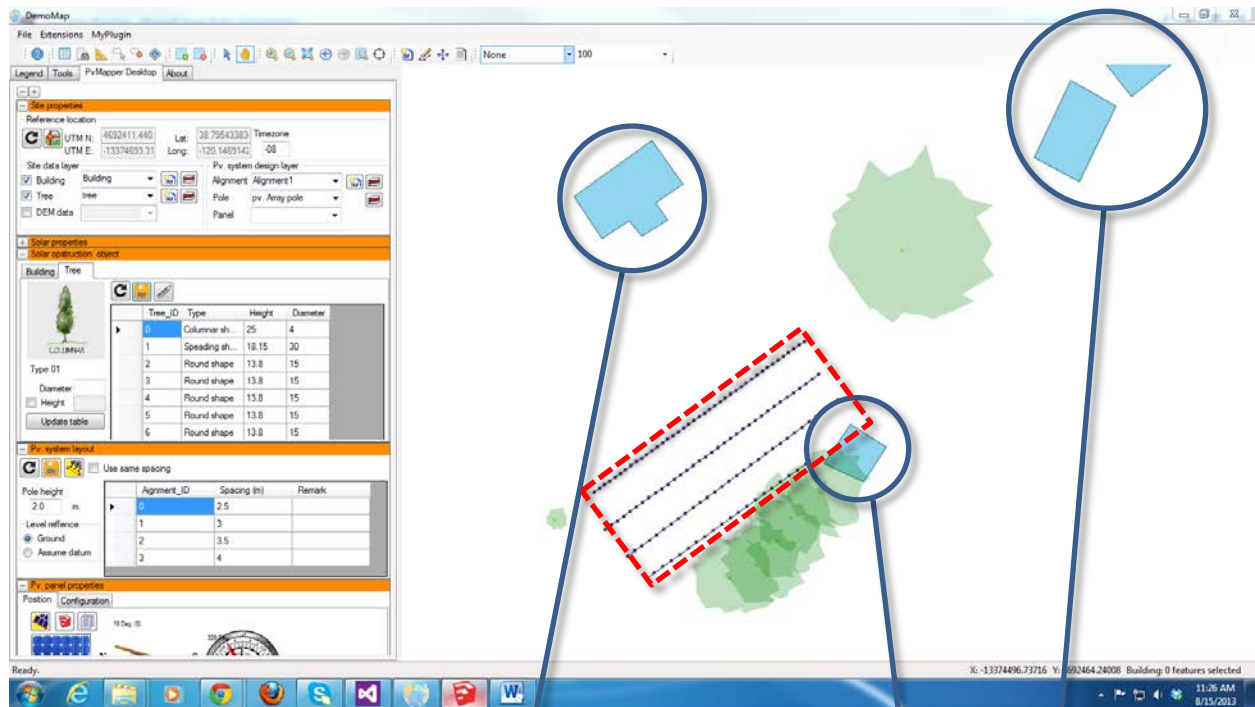

1 Export to Google Sketchup

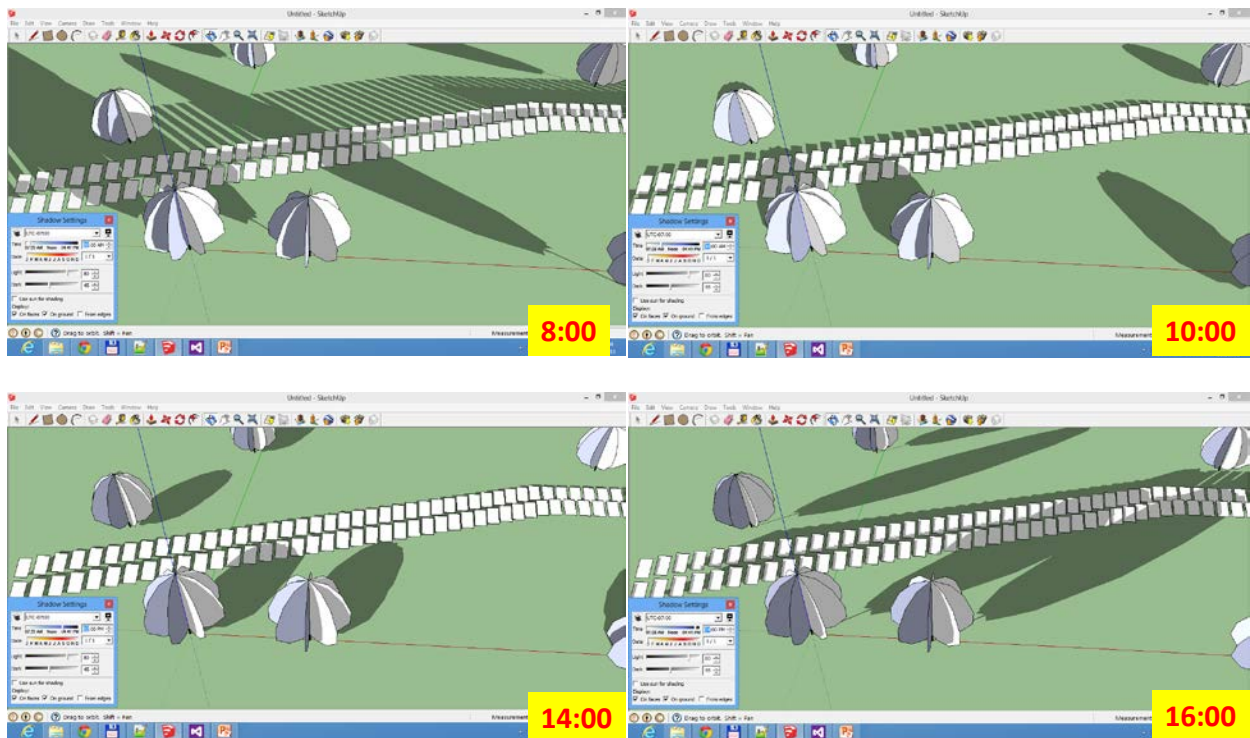

To export the user only needs to click one button  and then PvDesktop will create the Sketchup file.

The user can use import tools in Google SketchUp to load exported data into the program.

TIP

PvDesktop creates 3 Collada files (Building, tree, and Photovoltaic) and saves them all in the PvDesktop plugin folder.

2 Summary report

To make a summary report the user can click the  report button. Then PvDesktop will export the report to Microsoft word.
